

# Bio Solve

## Parts Degreaser and drain maintainer

### DESCRIPTION

Bio Solve is a cold solvent, degreaser and deodorant containing natural citric solvent. Use for spray cleaning electric motors, parts and equipment; dip cleaning electric motors, parts and equipment; to eliminate scum cake and liquefy grease in pumping stations, wet wells and sewer lines.

### FEATURES

- Non-conductive, dielectric strength 27000+
- Non-caustic
- Non-acidic
- Leaves no residue
- Fresh Citrus scent

### HOW TO USE

• For cold degreasing: Remove lint, dust and other loose material by blowing motor out with air. Replace worn or arcing brushes. Spray Bio Solve into motor until clean. Blow motor dry with air and lubricate promptly. Small motors may be cleaned without disassembling by dipping in a tank of Tri-Strength, removing and blowing dry with air. Bearings should be replaced with grease and the oilers should be refilled. • For grease trap maintenance: Always maintain a protective layer of 1 to 3 inches above water level. One quart will cover 60 square inches of surface at 1 inch depth, so a grease trap 1 foot square will require a little more than 2 quarts for the initial maintenance dosage. Traps which carry larger quantities of fats, oil and grease will require larger or more frequent maintenance dosage. If the trap is heavily loaded with grease, a manual cleaning of the trap must be done before initial dosage.

### SPECIFICATIONS

Physical Form	clear liquid
Color	Water White
Odor	Citrus
Specific Gravity	0.90
Flash Point	40° C

### HMIS SYMBOL

Health	2
Flammability	2
Reactivity	0
