

EZ COAT

Washable Grate Coating

DESCRIPTION

EZ Coat is a water base, fast drying, white grate coating that has been formulated with special resins to provide a hard, non-chalking barrier to protect paint booth grates, floors and walls. EZ Coat is an effective barrier for most paints, adhesives, waxes, and greases or oils.

FEATURES

- Water base
- Non-chalking
- Water rinseable
- Easily applied
- Rapid drying

HOW TO USE

EZ Coat can be sprayed, brushed or rolled onto the surface to be coated. A coating of 1-2 mils is usually sufficient to give protection against most paints and adhesives. Dry time is ½ to 1 hour, depending on the atmospheric conditions at the time of application. EZ Coat is easily removed with a stream of water. Increasing water pressure facilitates removal, as does soaking with water before spraying.

SPECIFICATIONS

Physical Form	viscous liquid
Color	White
Odor	mild ammoniated
Specific Gravity	5-10,000 cps @ 70° F
Flash Point	8.5-9.5

HMIS SYMBOL

Health	1
Flammability	0
Reactivity	0
